Background

The Energy Commission is holding a workshop to gather information about California's economic and demographic outlook and how business and industry will be impacted by the uncertain economic climate. During the workshop, a moderator will present questions covering major economic and demographic issues to three expert panels. The first panel will include economic forecasters, who will discuss California's projected future economic situation. The second panel will include business representatives focusing on California's economy from the point of view of business and industry. The third panel will include demographers discussing California's changing population characteristics. Time will be reserved at the end of each panel discussion for questions from the public. This workshop will provide an opportunity for energy demand

forecasters, Commission staff, and others to obtain further insight about possible economic and demographic outcomes in California.
